

SOCIAL WORK AND COMMUNITY DEVELOPMENT LEVEL 5

Conduct Community Crisis and Disaster Sensitization Programs

November/December 2025

Answer ALL the questions in this section

1. Communities experience different types of disasters, and it is important to record them clearly for better response. Give FOUR simple ways a community can record information about disasters. (4 Marks)
2. Categorization of disasters helps in planning appropriate interventions. State FOUR categories commonly used when profiling community disasters. (4 Marks)
3. Early warning signs can help communities prepare before disasters strike. List THREE early warning signs of disasters in communities. (3 Marks)
4. Awareness creation helps communities reduce vulnerability to disasters. State THREE methods used to sensitize communities on disasters. (3 Marks)
5. Disaster management requires strong partnerships at different levels. Mention FOUR partners usually involved in community crisis sensitization. (4 Marks)
6. Crisis planning and review meetings provide direction during disaster management. State THREE objectives of holding crisis planning and review meetings. (3 Marks)
7. Disaster audits are important for evaluating community preparedness. State THREE items assessed during a community disaster prevention and response audit. (3 Marks)
8. Mobilizing resources ensures effective disaster prevention and response. List THREE resources that may be mobilized for disaster prevention and response. (3 Marks)
9. Risk reduction measures help minimize the impact of disasters. State TWO measures of disaster risk reduction. (2 Marks)
10. Quick and effective response reduces losses during disasters. State FOUR common community disaster response measures. (4 Marks)
11. Documentation of disasters helps organizations learn and improve future responses. List FOUR features of proper disaster documentation tools. (4 Marks)

12. Monitoring disaster interventions ensures accountability and learning. State THREE reasons why regular monitoring of disaster response is important. (3 Marks)

SECTION B (60 MARKS)

*Answer question **THIRTEEN (13 Compulsory)** and any other **TWO (2)** questions in this section*

Case Study

13. A rural community has experienced recurring floods for the last five years, leading to destruction of crops, loss of livestock, displacement of families, and outbreaks of waterborne diseases. The local disaster management committee has conducted awareness campaigns, but limited resources and poor coordination have reduced their effectiveness. Community members are frustrated with the repeated losses and lack of preparedness measures. As a social worker, you have been assigned to help the community strengthen its disaster sensitization and management programs.
- a) Describe FIVE key components you would include in a community flood preparedness plan. (10 Marks)
 - b) Explain FIVE advantages of involving community members in preparing a flood plan. (10 Marks)
14. Local governments have an important role during disasters. They work with other stakeholders in response to communities affected with disasters.
- a) Discuss FIVE roles of local government during flood disaster response. (10 Marks)
 - b) Identify FIVE challenges that might occur when different actors work together during disaster response. (10 Marks)
15. Monitoring and evaluation are necessary for understanding disaster response outcomes.
- a) Outline FIVE indicators you would use to assess the effectiveness of a flood response program. (10 Marks)
 - b) Explain FIVE benefits of evaluating community disaster response programs. (10 Marks)
16. Flood-affected communities often face poor water, hygiene, and sanitation conditions.

These conditions can increase health risks and affect community wellbeing.

- a) Describe FIVE interventions you would implement to promote hygiene and sanitation in flood-affected communities. (10 Marks) b) Explain FIVE indicators you would use to assess the effectiveness of hygiene and sanitation interventions. (10 Marks)
